

BulkLine 2026

22-23 Oct. 2026 · Shanghai

Commodities & Maritime Summit

Participation Guide V1

BulkLine

A working summit anchored in value investing and global standards.

- Geopolitical shifts are accelerating the global focus from energy security to competition over critical resources;
- Bulk commodities and maritime systems—specifically sources and shipping corridors—are evolving into a “twin-resource system,” endowed with both geopolitical and commercial-strategic attributes, as the logic of value is rapidly being reconfigured.
- Amid rapid advances in offshore technology and engineering, the two domains are developing converging interests in offshore bulk resources, with emerging business models increasingly blurring industrial boundaries and offering global-scale potential.
- The BulkLine2026 Summit will convene global leaders to explore new perspectives on collaboration pathways and future trends.

Key Dates

Oct 21 (Evening)		Welcome Reception
Oct 22 (Morning)		Plenary Session
Oct 22 (Afternoon)		Summit I
Oct 23 (Morning)		Summit II
Oct 23 (Afternoon)		Site Visit

Pricing Tiers: Super Early Bird · Early Bird · Standard
Registration Deadline: September 12, 2026

Lens of Topics

Next-Generation Offshore Commodity Architecture (Sources & Engineering)
How can energy fuels, minerals, materials, and food be robustly coupled with marine systems?

Anticipating the Herd of Gray Rhinos (Shipping Lanes & Trade)
Can backup supply chain systems overcome dependencies on price, tariffs, regulation, settlement mechanisms, and routing?

The Intersection of Offshore Bulk and Shipping (Compound Value Logic)
— Investment perspectives on emerging “twin strategic resources” as geopolitical shifts and technological advances redefine boundaries.

Strategic Interactions for Building Operational Resilience (Capabilities Enabling ESG):
How to align commodities, maritime operations, competition, restructuring, compliance, safety, and expansion to navigate high-volatility cycles.

Composition of Prospective Invitees

System Operators
Shipping · Ports · Offshore Systems
A. Global Shipping & Maritime Operators
B. Ports & Infrastructure Platforms
C. Offshore & Marine Engineering

Resource & Asset Holders
Energy · Minerals · Bio-based Commodities
A. Energy & Fuel Producers
Oil & Gas / Green Hydrogen / Green Methanol / Green Ammonia / LNG
B. Minerals & Materials
C. Bio-based & Marine-linked Resources

Capital & Risk Allocators
Investment · Insurance · Strategic Capital
A. Infrastructure & Real Asset Investors
B. Energy & Commodity-focused Funds
C. Insurance, Credit & Risk Platforms
D. Strategic Corporate Capital
